Suet Pellets

Suet Pellets are a popular, high energy treat for wild birds, suitable for all year feeding. Our trusted recipe of deliciously nutritious blends of premium grade fats and oils pack concentrated energy bursts for all species of wild birds. The high protein level, make Suet Pellets an excellent substitute for natural sources, when it can be scarce. Their soft texture and small size means they can be easily carried and eaten by both adults and fledglings. They can be fed alone or mixed with other Bamfords Topflight bird food mixtures. Available in Insect, Mealworm, Berry and Blueberry & Raisin flavours.
