# Feeder Seed

Feeder Seed is a specifically designed mixture of free-flowing seeds for use in tubular feeders. The carefully selected seeds are rich in fat and oil to provide energy, especially when other natural sources of food are sparse. There is also a combination of 12 naturally found wild seeds that particularly entice British Finches such as the Bullfinch into the garden, whilst the Nigarseed is a favourite of the colourful Goldfinch. The added Pro-tec health aid boosts the nutritional value of this mixture by helping to naturally support the well-being of birds, supporting the micro flora in the gut and providing essential elements for the immune function.

- **Ideal for feeding from feeders**
- **Added Pro-tec Health Aid**
- **Attracts a variety of birds**
- **High in energy**
- **No whole cereals**

**Composition:** Pinhead Oatmeal, Black Sunflower, Hemp, Striped Sunflower, Wild Seed, Peanut Granules, Millet, Black Rapeseed, Linseed, Nigarseed, Canary Seed, Pro-tec Health Aid.

**Additives (per kg):** Pre-Biotic - (FOS) Frutafit HD 300mg, (MOS) Mannan Oligosaccharides 60mg. Trace Elements - E8 Selenium from selenium yeast Sc Strain R397 15mg, E6 Zinc chelate of amino acid glycine 11.54mg, E4 Cupric chelate from amino acid glycine 0.312mg.
