# PureFlax

PureFlax is a complementary feed for pigeons, naturally pure goodness that helps to improve racing performance. It provides slow release energy for during racing and helps with muscle recovery following the race too. We are proud to say our PureFlax is grown, cold pressed and bottled in the UK to retain all the natural nutrients with no chemicals added at any stage of production. Supplementing PureFlax to your bird's diet helps ensure your bird receives the perfect balance of Omega 3 & 6. It has fundamental benefits for supporting immune function, healthy digestion and the nervous system.

- **Slow Release Energy**
- **Glossy Plumage**
- **Muscle Recovery**
- **High Omega 3**
